

F6 Both arms report the same sign of asymmetry (corroboration, not replication:
different perturbation channels and different ablated checkpoints)

channel	member	asymmetry statistic	value	95% CI	sign
token (experiment 1)	qwen3-0.6b/base	$\log S1(\text{free}) - \log S1(\text{teacher-forced})$	3.225	[1.927, 4.478]	+
token (experiment 1)	qwen3-0.6b/instruct	$\log S1(\text{free}) - \log S1(\text{teacher-forced})$	3.438	[2.444, 4.671]	+
token (experiment 1)	qwen3-0.6b/ablated	$\log S1(\text{free}) - \log S1(\text{teacher-forced})$	2.637	[1.535, 3.628]	+
token (experiment 1)	smollm2/base	$\log S1(\text{free}) - \log S1(\text{teacher-forced})$	1.958	[1.001, 2.885]	+
steering (experiment 2)	instruct	up-ramp failure rate mid-generation	0.922	[0.848, 0.962]	+
steering (experiment 2)	base	up-ramp failure rate mid-generation	1.000	[0.959, 1.000]	+
steering (experiment 2)	ablated	up-ramp failure rate mid-generation	0.967	[0.907, 0.989]	+
